WORK EXPERIENCE

Data Analyst | Responsive Industries Ltd. (Flooring Manufacturer) Apr 2025 – Present

- Analyze sales, export and operational data using Advanced Excel (PivotTables, VLOOKUP and Power Query) to support management decisions.
- Build Power BI dashboards using data modeling and DAX measures to track sales KPIs, revenue trends and performance metrics.
- Analyze global trade data in Volza for export insights, competitor analysis and lead generation.
- Track customer and sales pipeline data in the company CRM.
- Prepare MIS reports and PowerPoint presentations for management.

Internal Auditor | CNK (Chartered Accountancy Firm) Aug 2024 – Jan 2025

- Assisted in financial audits to check compliance with regulations and internal policies.
- Analyzed financial records to identify discrepancies and risk factors, and helped prepare audit reports with recommendations.

Data Analyst Intern | AI Variant Feb 2024 – Aug 2024

- Used MySQL, Power BI, Tableau and Advanced Excel to extract, analyze and visualize datasets for business decision-making.
- Developed dashboards and visualizations for cross-functional teams, improving data accessibility

Trainee | Datamatics Global Services Ltd. (Logistics), Andheri, Mumbai Dec 2023 – Feb 202

- Supported an outsourced billing process and optimized data entry workflows using Excel.
- Managed confidential information and documents with discretion, maintaining proper organization.

PROJECTS

E-Commerce Analytics | SQL, Excel, Power BI

https://www.linkedin.com/in/srinivaspoojary/details/projects/

- Analyzed large e-commerce datasets using SQL and Excel to identify sales trends, order patterns and customer purchasing behavior.
- Evaluated payment methods, customer reviews and delivery timelines across product categories to identify drivers of satisfaction and high-performing orders.
- Built interactive Power BI dashboards with a data model and DAX measures to present key insights.

Solar Power Generation Prediction| Python, Streamlit

https://github.com/SrinivasPoojary/Solar-Power-Generation

- Performed Exploratory Data Analysis (EDA) to identify trends in solar power generation.
- Built Linear Regression and Random Forest models for energy output prediction.
- Deployed the final model using Streamlit for a user-friendly interface.
